THE OLYMPIA GOLD MINE

Situated on Shoal Lake, Will be Most Vigorously Developed.

We are pleased to record the fact that arrangements are in progress by which the Olympia mine, situated in the very heart of our richest and most productive mining district, will soon be among the operating mines of this interesting section. The Olympia has lately been examined and reported upon by most of the engineering and mining talent in this section, and also by some of the most eminently practical and experienced miners. Following is the result of an examination by Captain Jos. Hefke, of the Mikado gold mine: "I visited the Olympia last season and found a good strong vein 40 feet wide with a very good surface showing. This vein has a cross-cut showing one wall well and clearly defined, development not having so far reached the other wall. The dip is similar to the Mikado—immediately north—and its surface rock looks very similar to that of the No. 2 Mikado vein, which are not only chockers its character and color in depth, but also becomes richer."

"There is no doubt in my mind that an ore body of such size when opened up by development would pay hand some ly."

"Results at present from reliable assays averaging \$5.30 in gold per short ton from the cross-cut on large vein, the lateral extent of which is at least a quarter of a mile, or 1,320 feet; and needless to say that a body of such dimensions that can be handled so economically must be regarded as a very good proposition indeed."

"In addition there are several other large and small veins seen traversing the Olympia (M11 & S129) east to west, and dipping into 'Olympia,' or Hill Diver bay, in one of which veins to wards the boundary line, where a shaft has been sunk, a splendid showing of gold was visible."

"I may add that there is yet another

vein well worthy of attention. It occurs between the two former veins, working towards the large vein. Upon this, a test pit to a depth of 10 feet, has been driven. Its ore is quite rich and shows free gold."

The geological formation in Olympia group M11 & S129 is similar to that at the Mikado mine in every important respect. The Mikado vein is much larger at 600 feet (vertically) than it was at surface or at any intermediate depth, which in itself a very encouraging feature."

Among the most interesting of the group of mines surrounding the Olympia, may be mentioned the Mikado, Tycoon, Bullion, Imperial, S108, Monarch, Gold Coin, Cornucopia and Cameron Island, all of which are partially developed with excellent results in gold at various depths.

Sulta: a Mine.

Following is the report of the manager of the Sulta for the week ending 9th Feb. The reason for the lat publication of such reports is that they are sent to the directors in London and there published. We take this from the London B.C. Review:

"I have to report stoping ore in progress in south workings. The average assay value of the quartz broken and sent to the mill during the week is \$9.08 gold per ton. South air shaft was sunk 9 feet during the week. Quartz in shaft bottom is from 18 to 34 inches wide, and carries assay value of \$20.67 gold per ton. No. 4 level was advanced 16 feet, encountering quartz stringers and formation favorable for the occurrence of ore."

The Lower Neepawa Mine Sold

The Lower Neepawa mine in the Manitoba has been sold to New York parties. The negotiations were conducted through Mr. D.H. Alston of Winnipeg. It is understood that the price is a good one.

The Cross Lake Gold Mining Co. of St. Paul, of which Paris Fletcher is president, has let a contract for sinking a shaft 100 feet on G109, which is situated on Cross Lake, north of the Lower Neepawa. Supplies have been sent in.

EAGLE LAKE DISTRICT.

Recent Rich Discoveries—Active Development Going On.

Notwithstanding the fact that the royal metal was discovered here during the work of construction of that section of the C.P.R., skirting the picturesque shores of Vermilion bay, an arm of Eagle lake, as long ago as the winter of 1881-2, yet it was not until the advent of the present century that any appreciable interest was displayed in its investigation or that anything definite in the way of practical results has been brought about. But before calling attention to the numerous discoveries and active development for gold now going on around this body of water, we will give a brief outline of how to reach this new eldorado, so long neglected or forgotten by the practical geologist, explorer and miner.

Eagle River crossing, the only outlet from the lake of that name, is about 233 miles west of Port Arthur, and 67 miles east of the town of Rat Portage—the distributing point for mining, lumbering and construction supplies on the main line of the C.P.R. This section of our great transcontinental highway was long known and, as a matter of fact, became historic in the way of heavy construction works, as "Section B," being that portion of the government work situated between the Winnipeg and Eagle rivers, a total distance of 68 miles, the contract extending to the Winnipeg river, about a mile west of the C.P.R. station at Rat Portage. It was during the work of getting bridge and other timber for the construction of engineering quarters at Vermilion bay, and the bridge at the Eagle River crossing, that a party so employed in a camp on Eagle lake, some 20 miles south of the track, made the first discovery of native gold, fine samples of which, in apparently float quartz, in granite formation, were shown to certain of the government engineers then employed on the C.P.R. works.

During last fall, among others, Stoddard Foster and his partner discovered and located what is now known as the Parlington claim, being a large island. They have one vein here measuring 7 feet wide, with several test pits ranging from 5 to 20 feet; the quartz of which gives exceptionally good results in visible gold by panning. To the east of this another lode from which

ings, and a shaft on the main quartz vein to a depth of 65 feet, with some 90 feet of drifting from the first level. N. Higbee is the company's agent there. The ore of this claim give very satisfactory returns in gold from top to bottom.

In addition to the foregoing—owned chiefly at this end—there are several very promising claims owned by Port Arthur, Winnipeg and eastern people, but upon which no appreciable amount of work has been done.

WILL NOT PARTICIPATE.

Members of the Constabulary Not Included in the List of Patriotic Fund Beneficiaries.

Ottawa, March 17.—Those who have enlisted in the South African Constabulary will not participate in the Canadian patriotic fund. On this other hand, the members of the Canadian contingents who remained in South Africa to serve in other corps, have not thereby invalidated their claims upon the fund. This was decided at a meeting, on Saturday of the executive committee of the fund association held in the governor-general's office. The ground taken was that the Constabulary, being strictly a permanent Imperial organization, its members are not included among those for whose benefit the fund was raised.

WILL CARRY OUT THE CROP.

The Canadian Northern Will be Completed This Year, Mr. Wm. Mackenzie Says.

"The people of Manitoba are well satisfied with the railway agreement," said Mr. Mackenzie in Toronto. "The agitation we hear about is made to order. We are not throwing down the gauntlet to the C.P.R. We are simply going along, saving wood."

The gaps in the Canadian Northern's four hundred odd mile stretch between Winnipeg and Lake Superior are being rapidly closed up, Mr. Mackenzie said, and the road will be ready to carry out the crop of 1901. The leasing of the Northern Pacific lines will enable it to run straight from Port Arthur to Brandon, Portage is Prairie, and the Swan River country in the north-western corner of Manitoba.

Rev. R. P. Mackay, at Knox Church

The Rev. R. P. Mackay, D.D., of Toronto, preached Sunday evening last in Knox church. Dr. Mackay is the foreign mission secretary of the Presbyterian church in Canada. He took for his text Matt. 11: 12. His theme was enthusiasm. He showed that great accomplishment in life was possible only to the enthusiast. Not intellect, nor strength could take the place of

BOOMING NEW ONTARIO.

Banners Across the Streets and on the Street Cars of Toronto.

Toronto Star: The street cars are carrying the message of the New Ontario delegates now, a message which invites all to the Rossin house to view the exhibits from their fertile country, and across the corner of King and Yonge streets, above the hurrying, currying thousands, an immense streamer calls attention to New Ontario.

The speaking street cars, the flapping, flaunting streamer, are all tributes to the busy Booster. Mr. D. F. Burk, who day and night, night and day, is laboring, developing plans to increase the population of that great country.

"This is the way we touch the hearts of the Toronto manufacturers," said Mr. Burk this morning. "We ask them this: 'You sell \$1,000,000 in goods to a population of 75,000 per cent; now if that population was \$300,000, what would you sell?'"

Armed with this question, the men from New Ontario, headed by the great and only Burk, visited many of the manufacturers of the city today and drew their attention to their home.

In New Ontario there is room for a million men owing 100 acres each.

FREDERICK VILLIERS

The Great War Correspondent Will Lecture in Hilliard Opera House March 30.

The people of Rat Portage will have an opportunity to hear Frederick Villiers, the great war correspondent in the Opera House, Saturday evening, March 30. He lectured in Massey Hall, Toronto, last week. Following is a report from the Toronto Star:

"Over 3,000 of the most representative people greeted Frederick Villiers, the world-famed war correspondent and artist, at Massey Hall on Saturday evening, and were delighted at what they heard and saw. Over 200 pictures were shown, pictures of snap-shots taken by him during the heat of battle, pictures of the tragedy of death, pictures that told the story that war was hell, pictures humorous and pictures grave. Many sketches were also shown from the pen of the lecturer. One of the saddest sights was the view of a procession marching to the grave to bury the slain of Magersfontein. Another picture showed Colonel Otter,

every description, but if the popular want is to be supplied the largest percent will be expended upon works of fiction. The statements of city librarians prove conclusively that the reading public are above everything else, novel readers. The great books, the books of science, add research; the books of philosophy and truth, the historical and biographical are almost totally ignored. The well read person of today is the person who reads every new novel that comes out. He is consequently a reader of a great deal of trash for the great body of modern novelists are giving to the world a vast amount of plot, blood and thunder, and sickening die away love. Their books, despite all the eulogiums of flattering critics and the favorable notices of the press, cannot compare with the great masterpieces of fiction produced in the early years of the last century. That their work should be so eagerly seized speaks but poorly for the intelligence of readers in this age. A man, properly speaking, will be well read only when he has fairly mastered the great books. When the splendors of Shakespeare and Milton have surged through his soul, when the cords of his heart have been swept by the master hand of the plowboy poet and the melodies of Tennyson have made music in his heart, when Scott and Dickens and Thackeray and Eliot and Hugo have fed his imagination and broadened his vision with their poetic power, when Carlyle and Ruskin and Emerson have lifted his thoughts above the mean, the paltry and the base, when Farlar and Deunmond and Blackie have touched him with their thoughts of higher things, then, and then only, has he in any way the right to be called a readers."

All the writers are well known names, but of their works very few have any knowledge whatever."

The Electric Light Question. The legislature has refused consideration of the amendment to the special act being obtained by the town to legalize the tax rolls. This amendment was to empower the town to take over the electric light plant if the approval of the ratepayers was secured. Owing to certain formalities not having been complied with, the standing orders committee refused to send it before the house.

There has been considerable discussion during the past few days in town relative to the amendment, many describing it as harsh and one not fair to the Electric Light Co. On the face of it the amendment does seem rather strong, but we believe, however, that the council had no intention of being harsh on the question, and the amendment sought to be put through was merely to enable the town to expedite matters should the ratepayers decide to purchase the plant. The case in short seems to be as follows: The council had a bill before the house to enable them to legalize the tax rolls and sell lands for taxes, and inasmuch as some members of the council thought if the town proceeded to take over the electric light plant

ROYAL JUBILEE HOSPITAL.

Annual Meeting Held Last Night for Receiving Statement and Election of Directors.

The adjourned annual meeting of the Royal Jubilee Hospital was held in the Council chamber last evening, his honor Judge Chapple presiding.

The report of the directors showed that there were 150 patients treated during the year, 68 cases being typhoid fever and of these there were only 2 deaths, which speaks well for the skill and care of the hospital staff.

The following gentlemen were elected directors to serve three years: Messrs. Thompson, Nicholson, Earnsey and Belyea, and G. C. Frisbie to serve one year.

KNOCKED OUT.

JAMES HAMMOND KILLED

A Well-known Pioneer and Prospector Loses his Life Unloading Machinery.

We have just received intelligence of the accidental death of James Hammond, a well-known pioneer and prospector, at Bonheur, while superintending the transportation of mining machinery to the scene of one of his latest enterprises.

The late Mr. Hammond came to Prince Arthur's Landing, when that embryo city was but a hamlet (1879) and his career for at least a quarter of a century between Port Arthur and Fort William has been conspicuous for energetic, intelligent and successful enterprise. Since moving to Fort William west, Mr. Hammond has been into lumbering, railroading and, as but not least, in prospecting and active mining.

In his later ventures Mr. Hammond was associated with the Folger Bros. of Kingston, Ontario, both in iron, copper, silver and gold. These enterprises extended over a period of 12 years and covered an area of many thousand square miles. It was in the upper reaches and expansions of La Selva River, called Sawbill Lake, where his last and best known mining enterprise was located, viz., the Hammond Reef. Needless to say the untimely death of Mr. Hammond will be deeply regretted all over the district.

There has been considerable discussion during the past few days in town relative to the amendment, many describing it as harsh and one not fair to the Electric Light Co. On the face of it the amendment does seem rather strong, but we believe, however, that the council had no intention of being harsh on the question, and the amendment sought to be put through was merely to enable the town to expedite matters should the ratepayers decide to purchase the plant. The case in short seems to be as follows: The council had a bill before the house to enable them to legalize the tax rolls and sell lands for taxes, and inasmuch as some members of the council thought if the town proceeded to take over the electric light plant

contract extending to the Winnipeg river, about a mile west of the C.P.R. station at Rat Portage. It was during the work of getting bridge and other timber for the construction of engineers' quarters at Vermilion bay, and the bridge at the Eagle River crossing, that a party so employed in a camp on Eagle lake, some 20 miles south of the track, made the first discovery of native gold, fine samples of which, in apparently float quartz, in granite formation, were shown to certain of the government engineers then employed on the C.P.R. works.

During last fall, among others, Stoddard Fomeri and his partner discovered and located what is now known as the Partington claim, being a large island. They have one vein here measuring 7 feet wide, with several test pits ranging from 5 to 20 feet: the quartz of which gives exceptionally good results in visible gold by panning. To the east of this another lode from which the

MARVELLOUSLY RICH GOLD QUARTZ now displayed in the Partington Supply Co.'s store on Second St., was obtained.

Next comes the Bruce-Prendeville claim, close to the Eagle company, another island with three veins upon which small shallow pits have been sunk, assays of their quartz giving very encouraging results.

Although having but an area of twenty-five acres, the Yiking island is one of the most attractive of the partially developed claims on Eagle lake. It is traversed by three well defined quartz veins, upon two of which test pits varying in depth from 5 to 13 feet, have been driven, and from the ores of which by a series of assays and by pin and mortar amalgamation excellent results in fine and coarse gold resulted; while other veins intersecting the two main ones show well visible gold at surface.

There is a snug camp constructed upon the Yiking claim, as also upon the "Eagle Co.'s," and on others referred to.

Within two miles of the latter claim is the El Dorado camp of Gathensbury & Co. This claim is upon a peninsula. They have here a Frazer & Chalmers 2-stamp mill. Their large quartz vein occurs in a bluff of some elevation and is worked by open cut. The vein is over 7 feet wide and of highly auriferous quartz.

Another claim deserving of special mention, but upon which little work has been done, is that of S47, some two miles south from the Partington bonanza, but upon the main land. The S47 has an area of 80 acres, has a massive deposit of auriferous quartz measuring nearly 200 feet wide, that for a large body of ore gives really phenomenal results in gold.

Arrangements are being perfected to operate most, if not all of the foregoing claims this spring, while, as a matter of fact, two of them, including the "Eagle Co.," have a full force of miners at work. The prevailing formation here is that of the porphyreous and coarse gray granite with intrinsic traps and some bands of red granite. The vein characteristics everywhere partake of the fissure series, cutting directly across the formation, with, for the most part, very well defined walls.

Work at the Eagle Lake Co.'s mine consists of a good camp and outbuild-

ings going along, sawing wood."

The gaps in the Canadian Northern's four hundred odd mile stretch between Winnipeg and Lake Superior are being rapidly closed up, Mr. MacKenzie said, and the road will be ready to carry out the crop of 1901. The leasing of the Northern Pacific lines will enable it to run straight from Port Arthur to Brandon, Portage la Prairie, and the Swan River country in the north-western corner of Manitoba.

Rev. R.P. Mackay, at Knox Church

The Rev. R.P. Mackay, D.D., of Toronto, preached Sunday evening last in Knox church. Dr. Mackay is the foreign mission secretary of the Presbyterian church in Canada. He took for his text Matt. 11: 12. His theme was enthusiasm. He showed that great accomplishment in life was possible only to the enthusiast. Not intellect, nor strength could take the place of fervor. Especially was it true in the history of church life, that the man of earnestness was the successful worker, and the churches today that were making any advance whatsoever were not those who plumed themselves upon a frigid propriety, nor the lukewarm in service. Those of missionary spirit who went out and compelled the degraded and neglected to come in were the full and strong churches.

Directing attention to missions Dr. Mackay said it was the field in which enthusiasm could most worthily display itself. The work of evangelization was the greatest of all enterprises. The Leader under whom we served was One of whom men need never be ashamed. They might call the roll of great men from the whole past and Jesus would be found above them all. This work brought us into fellowship also with many humble heroes, men and women of dauntless courage and great self-denial, of whom the world was not worthy. He emphasized also the pressing need of the world. The spiritual destitution of the heathen was very great. It was indeed appalling. Success too of unprecedented measure had been attained in missions. No other enterprise could boast of such progress. In the last century more people had been brought to the knowledge of Christ than in the 18 centuries previous of the Christian Era. The rapid advance had been the embarrassment of missionary societies. That this labor offered the richest rewards was an additional reason for enthusiasm, reward in this life, the satisfaction of good done, and reward in the life to come. The speaker closed with an earnest appeal for deeper interest in missions in general, and in particular for sympathy and co-operation in the work inaugurated among the Indians of the Lake in the Woods district.

Dr. Mackay left Monday morning for Shoal Lake and the Northwest Angle in company with the missionary, Rev. A. G. McKittick. He preaches Thursday evening at Mikado, and leaves here Saturday morning for Winnipeg.

The steamer Balmoral which has been anchored out in the bay during the winter sank on Tuesday night.

The Great War Correspondent Will Lecture in Biltmore Opera House March 30.

The people of Rat Portage will have an opportunity to hear Frederick Villiers, the great war correspondent in the Opera House, Saturday evening, March 30. He lectured in Massey Hall, Toronto, last week. Following is a report from the Toronto Star:

"Over 3,000 of the most representative people greeted Frederick Villiers, the world-famed war correspondent and artist, at Massey Hall on Saturday evening, and were delighted at what they heard and saw. Over 200 pictures were shown, pictures of snapshots taken by him during the heat of battle, pictures of the tragedy of death, pictures that told the story that war was hell, pictures humorous and pictures grave. Many sketches were also shown from the pen of the lecturer. One of the saddest sights was the view of a procession marching to the grave to bury the slain of Magersfontein. Another picture showed Colonel Otter, Colonel Septimus Denison, Surgeon-Major Wilson, Capt. Barker, Lieut. Wilkie and Marshall. Pictures of Sir Redvers Buller, Major-General Hutton, and General Methuen were received with outbursts which showed them favorites with the three thousands.

A Strange Case.

Vienna, March 17.—A sensational arrest was made here yesterday. Hetti Vogl, the proprietor of the largest exchange office on the Graben, was taken into custody on the charge of having poisoned in April, 1900, a rich Russian named Taubin, who was supposed to have bequeathed his property to Vogl who has since enjoyed it. The circumstances of the case are as follows:—Taubin, who was a Jew miser and drunkard, lived in a squalid manner. One night a policeman took him home drunk and bleeding. A doctor who was summoned, told Taubin's old charwoman to bring his friends as he was dying. She brought Vogl, whom she knew as an acquaintance, of Taubin. Vogl took a lawyer and a clerk with him to the miser's house. Upon arriving at the bedside the dying man, it is stated, recovered sufficiently to say that all his possessions should go to Vogl, after which he died immediately. The bequest thus ostensibly made in the presence of witnesses was legally regular and Vogl inherited property to the value of \$200,000. Taubin's body was cremated. His Russian relatives subsequently represented to the police that Vogl poisoned him, and they also declare that Vogl is a ventriloquist, and himself spoke the words bequeathing the property to himself when Taubin was already dead.

Books and Readers of Books.

Carnegie's numerous gifts to various Canadian and American cities for the establishment of city libraries and the eagerness and thankfulness with which they were received are but another evidence of the power and importance of books.

The vast sums which Mr. Carnegie has given will of course be sufficient to provide the most excellent books of

names, but of their works very few have any knowledge whatever.

ROYAL JUBILEE HOSPITAL.

Annual Meeting Held Last Night for Receiving Statement and Election of Directors.

The adjourned annual meeting of the Royal Jubilee Hospital, was held in the Council chamber last evening, his honor Judge Chapple presiding.

The report of the directors showed that there were 150 patients treated during the year, 68 cases being typhoid fever and of these there were only 2 deaths, which speaks well for the skill and care of the hospital staff.

The following gentlemen were elected directors to serve three years: Messrs. Thompson, Nicholson, Farrington and Belyen, and G. C. Frisbie to serve one year.

KNOCKED OUT.

Following is a copy of the amendment to the tax bill which failed to get the approval of the standing order committee of the legislature.

"In case a by-law is passed with the assent of the ratepayers declaring that it is expedient in the interests of the town of Rat Portage to acquire the works of the Citizens' Telephone & Electric Light Company of the town of Rat Portage, so far as the same are necessary or desirable for the operation of an electric light, heat and power system in the town of Rat Portage, the corporation of the town of Rat Portage, may thereupon forthwith by its officers take possession of the works of the company and all property used in connection therewith for the purpose of supplying electric light, heat and power whether the works and property or any of them are within or without the municipality and shall pay therefor at a valuation to be determined by arbitration in accordance with the provision of "The Municipal Act" and amendments thereto.

"2. For the purposes aforesaid the corporation may exercise all the powers set forth in R. S. O., chapter 193, in the same manner as though they were acquiring a gas or water works undertaking.

Developing the Gordon Property.

Jas. Gordon has commenced operations on the Gordon property, adjoining the Champion mine, about six miles from town. It is likely that work will be continued throughout the season.

The Reward is Coming.

Hamilton Post: If ever a district was properly booned, New Ontario is now receiving that favor at the hands of the delegation that has taken possession of Toronto. These men have implicit faith in the value of advertising, and they will have their reward.

The Game of Skat.

An illustrated treatise on this popular German game has been issued by the Passenger Department of the Chicago, Milwaukee & St. Paul R'y. The rules of the game revised to bring them up to date are given, and those interested in Skat will find it an instructive publication. A copy may be obtained by sending ten (10) cents in postage to F.A. Miller, General Passenger Agent, Chicago, Ill.

mine was to change the law to take over the electric light plant in the approval of the ratepayers was secured. Owing to certain formalities not having been complied with, the standing order committee refused to send it before the house.

There has been considerable discussion during the past few days in town relative to the amendment, many describing it as harsh and one not fair to the Electric Light Co. On the face of it the amendment does seem rather strong, but we believe, however, that the council had no intention of being harsh on the question, and the amendment sought to be put through was merely tenable the town to expedite matters should the ratepayers decide to purchase the plant. The case in short seems to be as follows: The council had a bill before the house to enable them to legalize the tax tolls and sell lands for taxes, and inasmuch as some members of the council thought if the town proceeded to take over the electric light plant that some delay might occur, and to save possible chances of delay and misunderstanding, it was deemed advisable, if possible, get the town's position cleared up by a special clause in the tax bill covering the matter of the purchase of the electric light plant.

We understand that the town has been advised by eminent counsel that there is nothing in the by-laws or agreements to prevent them from proceeding to take over the plant of the company as provided by the Council Act. It seems the only completed by-law that concerns the contract has a clause in it reserving to the council the right to rescind it if they see fit.

The further negotiations between the council and the company will be conducted under the provisions of the Council Act, as was the original intention of the council, and as if no special powers had been applied for. This will take much more time, and as time cures many misunderstandings, it will do so in this case, and the council and the company will yet reach an equitable settlement.

Archbishop McRae, of Winnipeg, will be here on Sunday next to officiate at St. Albans' church when the members confirmation class, which has been preparing under Rev. Mr. Page, will be confirmed at the morning service. In the evening the Boy's Brigade will parade in a body to the church.

RAT PORTAGE, ONT., MAR. 22, 1901

EDITORIAL NOTES.

The catch of fish in Ontario last year was 25,147,191 pounds, as compared with 27,034,283 in 1899. The diminution was chiefly in whitefish, herring, trout, pickerel and pike. There has been a considerable growth in the bass and lake trout industry, Lake Nipissing showing a catch last year of 15,141 pounds. Lake Erie leads in herring, Lake Huron in trout and whitefish, and Lake Ontario in catfish; perch and other coarse varieties.

Secretary Irwin Mahon of the International Mining Congress, advises us that the state legislature of Idaho has passed a bill and the Governor has signed the same, appropriating \$5,000 for the benefit of the congress which will be held in Boise City July 23, 24 and 25th next. It is likely several representative mining men from this district will attend the Congress and take part in the discussions.

Governor Odell of New York State confesses that he sees no means by which the Legislature can get over the fact that the port of New York is several hundred miles further from Liverpool than Montreal. His logical conclusion is that there is no use in discussing the enlargement of the Erie Canal as a competitor with the canals of this favored Dominion.—Globe.

Mr. Dyke, of Liverpool says that many of the English volunteers who have returned intend coming to Canada to settle. They are described as much above the average and many of them have money to start farming. Evidently our fellows did good missionary work as well as fighting.

THE QUEEN'S FAVORITE.

It is said that of all the panegyrics and tributes in prose or verse ever written of Queen Victoria, the one that pleased her most was the following quaint little poem of four stanzas, entitled "She noddit to me," which originally appeared anonymously in an obscure Scottish newspaper:

"I'm but an auld body
Livin' up in Denside
In a two-roomed bit hoosie
Wi' a tootie beside;
Wi' my coo an' my grumphy
I'm as happy's a bee,

A FAMOUS BEAUTY'S RESCUE

Emily Marshall's Walk Over a Human Bridge at Niagara.

Writing of "The Loveliest Woman in All America," William Perrine, in The Ladies' Home Journal, recalls the thrilling adventure of Emily Marshall, the famous Boston beauty, at Niagara Falls. She, with Nathaniel P. Willis and a young, ungainly college student, Job Smith, attempted to go under the falls. In those days a perilous undertaking. After they had proceeded a short distance under the sheet of water there was a rumbling noise and a commotion, and a part of the ledge which formed the path disappeared, cutting Miss Marshall off from her companions by an abyss six feet in width and leaving her but a small stone in the swirling torments to stand upon.

"In the commotion Job had been forgotten, but instantly a ray of hope shot into Willis' heart when he saw his rugged features, his sandy hair plastered over his forehead, his scanty dress clinging to his form like skin and his hand trembling on the poet's shoulder as he attended his steps. Without saying what he intended to do he crept down carefully to the edge of the foaming abyss till he stood up to his knees in the breaking bubbles. It seemed impossible that he could reach the lovely creature or that she could jump forward safely from the slippery rock in to his arms.

"Willis covered his eyes in fear and wonder. The next moment when he opened them there lay at his feet the quivering and exhausted girl. Job was nearly seven feet high. He had flung himself over the gulf, caught the rock with his fingers and with certain death if he missed his hold. Miss Marshall had quickly walked over his body in its bridge-like posture. At this moment the guide returned with a rope, fastened it around one of Job's feet and dragged him back through the wilderness. When he recovered from the whirlpool, when he felt on his knees in a prayer of thanks to God, in which the poet and the beauty devoutly joined him."

HE ASPIRED TO OFFICE.

And He Will Never Forget His First Lesson in Politics.

One Detroit who hopes some day to be elected to the legislature jollies the reporters by saying that he used to be a member of the craft. One of them, who prefers evidence to bare assertion, asked the political aspirant all about it and extorted this reluctant explanation:

"Well, just between you and me, it was this way: My father ran a weekly paper down in Indiana, and it was the party organ in the county. When I got home from college, I made up my mind that I was about ripe to be the clerk of courts. The old gentleman told me that I was pretty raw; but he agreed to be my strategy board and said he reckoned he could pull me through if I'd obey orders and make no moves on my own responsibility. I can see now that he was a great general, but you know how heady a young fellow is before the world has bumped him a few times.

"So I put up what I thought was a great scheme and kept it from the governor. The truth is that I thought him just a little slow for my class. The man against me on the opposition ticket lived in another town, and we had a good deal of business. The judge told

HE WORKED DESTRUCTION

A Sample of What a Fairly Healthy Cockatoo Can Do.

A light chain securely fastened on the cockatoo's leg promised safety, but he contrived to get within reach of my new curtains and rapidly destroyed some half yard or so of a hand painted border, which was the pride of my heart. Then came an interval of calm and exemplary behavior which lulled me into a false security. Cockie seemed to have but one object in life, which was to pull out all his own feathers and by evening the dining room often looked as though a white fowl had been plucked in it.

I consulted a bird doctor, but a Cockie's health was perfectly good and as I felt all that could be recommended, it was supposed he only plucked himself for want of occupation, and firewood was recommended as a substitute. This answered very well, and he spent his leisure in gnawing sticks of deal, only when no one charged to be in the room he used to unfasten the swivel of his chain, leave it dangling on the stand and descend in search of his playthings. When the fire had not been lighted, I often found half the coals pulled out of the grate and the firewood in splinters. At last, with warmer weather, both coals and wood were removed, so the next time Master Cockie found himself short of a job he set to work on the dining room chairs first pulled out all their bright nails and next tore holes in the leather dragged the stuffing.

As one time he went on a visit for some weeks and ate up everything within his reach in that friendly establishment. His "bag" for one afternoon consisted of a venerable fern and a large palm, some library books, newspapers, a pack of cards and an arm chair. And yet every one adores him and he is the spoiled child of more than one family.

Life on the Rail

Mr. Geo. Cummings, Bayrie, Ont., one of the best known engineers on the G. T. R., writes:—"For years I suffered from kidney disease, brought on by railroad life. The doctors called it 'railroad kidney,' but could give me no permanent relief. A friend recommended Dr. Chase's Kidney-Liver Pills, saying they had cured him. A few boxes of this grand medicine completely cured me, putting an end to the dreadful pains in the back and greatly strengthening the kidneys. I am well man to-day, thanks to Dr. Chase. One pill a dose, 25 cents a box."

Boyish Feud Ends in Murder.

Chicago, March 13.—Murder ended a boyish feud last night under the shadow of St. Stanislaus church at Noble and Bradley streets. Fifteen-year-old Thomas Laczowski was shot through the heart by a long playing knife. Frank Winkowski, a member of the shooting Father Baleszinski's squad Winkowski in the hallway in the act of loading a revolver. "Stop," cried the priest, "Stop! Command you!" While the priest in his flowing robes ran toward Winkowski, impeding with uplifted hands, for peace the boy fired. Half a hundred boys and girls also witnessed the tragedy and saw the murderer escape, which he did by flourishing his smoking pistol freely and keeping the crowd at bay. Thereafter occurred at the close of a

White Watery Pimples.

Five years ago my body broke out in white watery pimples, which grew so bad that the suffering was almost unbearable. I took doctors' medicine and various remedies for two years but they were of little benefit, whenever I got warmed up or sweat the pimples would come out again.

A neighbor advised Burdock Blood Bitters, and I am glad I followed his advice, for four bottles completely cured me.

That was three years ago and there has never been a spot or pimple on me since.

James Lashouse,

Brechin P.O., Ont.

THEY WERE ALL SCARED.

A Case of Highway Robbery With a Peculiar Ending.

What the hero of this story kicks about is the fact that his wife forget her sacred word never to say anything regarding it. His business keeps him out late, and he frequently carries considerable money. When footpads are reported in evidence, he gets as nervous as he can by street car and then takes the best lighted route to his house.

One night he had reached the front of his own place and had just drawn a long sigh of relief when the order "Hands up!" startled him into compliance. One man held a gun in the immediate neighborhood of his car and another systematically robbed him of everything worth carrying off. The order then was that he walk around the block so as to defer the use of his telephone, and it was clearly stated that any attempt to turn back, run or call for help would result in his being assassinated.

Before he reached the corner it struck him that the voice of one of the men sounded familiar and then that his own was a near neighbor, greatly given to practical joking. Luck went on times, his revolver in his right hand, and surprised the footpads as they were dividing the spoils. He made them lay everything on the walk, and when they straightened up awaiting the next order he discovered that

SASH AND DOOR DEPARTMENT.

Rat Portage, Oct. 1st, 1900.

Do you ever try to dye over your faded and unsightly garments? Ten of thousands in Canada do this more successfully and well. To those who have not tried this work of true economy, we would say, "there is money in it." What you do to the work of "Dionnoe Dyes." Old dresses, suits, skirts, capes, jackets, blouses, silks, ribbon, etc., can easily be renewed and made to look as well as new goods at small cost. Ten cents for a package of one of the fashionable colors of Dionnoe Dyes will save you several dollars. This work of renewing and tinting clothing can only be well done when you use the Dionnoe Dyes. Ask your dealer for them; take no chances.

RAINY RIVER FREE GRANT LANDS

Homesteads Available for
Settlement on Canadian
Northern in Ontario.

It is officially announced that sixty thousand acres of the free grant, land in the Rainy river district have been surveyed and are now available for settlement.

The general provisions of the free Grants and Homesteads Act apply also to free grants in the Rainy river district, which will soon be traversed by the Canadian Northern railway, with these differences:

The limit of a Rainy river free grant is 100 acres. The male head of the family or the sole female head of a family having a child or children under eighteen residing with him or her may locate for 100 acres, and may also purchase an additional 80 acres at \$1 an acre.

The settlement duties are: (1) To have at least fifteen acres cleared and had under cultivation, of which two acres at least are to be cleared and cultivated annually during the three years; (2) To have built habitable house, at least 15 by 20 feet in size; (3) And to have actually and continuously resided upon and cultivated the land for three years after location.

A locatee who purchases an additional 80 acres must, within three years, clear fifteen acres and cultivate the same. Patents may issue at the expiration of three years from the date of purchase, upon which the settlement duties have been performed. Pine-trees and minerals are reserved from the sale. The locatee may cut and use such pine-trees as he requires for building fencing and fuel on his land, and may also cut and dispose of any pine required to be removed in the process of clearing, but he must pay timber dues on pine so disposed of. Trees remaining on the land at the time the patent issues pass to the locatee.

The following townships are now open for location under the Rainy River Free Grants and Homesteads Act: Carleton Place, Alton, Blue, Wawaraton, Nelles, Carpenter, Dikie, Pettibone, Morley, S. of Morley, Telford, Peniston, Rosedale, Barwick, Lash, Aylsworth, Devin, Woodgait, Crozier, Roddick, Dabie.

The agents for the sale and location of the lands are: Wm. Campbell, Rainy River P.O., agent for the townships of Jacobethy, Shenston, Telford, Pettibone, Morley, Dikie, Nelles, Blue, Wawaraton, Carleton and Alton; Wm. St. John, Big Forks P.O., agent for the township of Barwick, Lash, Aylsworth, Devin, Woodgait, Crozier, Roddick, Carpenter, and Dabie.

A FAST BALL PLAYER

HE MAY OR MAY NOT HAVE PLAYED
WITH THE ROARERS.

Steve Speed, Who Could Beat His Own Throw to First and Who Could Get Behind the Plate in Time to Catch His Own Pitching.

"The fastest base runner I ever saw," said the fat ex-mascot of the Lightfoot Lilies in comparing baseball of the present with that of the old days, "was little Sammie Salmon of the Lilies. But the fastest base runner I ever heard of was, or wasn't, as the case may have been, Steve Speed, who played, or who didn't play, I don't know which, with the Ringtail Roarers. At any rate, whether he ever played with the Roarers or not, he was certainly the fastest that ever came over the crossways. You don't understand? Well, I'll tell you all about him.

"One afternoon about a month before the last game we ever played with the Ringtail Roarers the boys were all sitting round in the postoffice discussing our chances for the big contest. Captain Sluggo Burrows, who was leading postoffice that day, was over in the corner reading the ball news in a Jones County Courier that had accidentally slipped in his wrapper before delivery. Suddenly he clutched the paper tightly and sprang to his feet. For heaven's sake, boys, listen to this: 'We have it from a high source,' he began to read breathlessly, 'that the Roarers have unearthed a phenomenal base runner, with whose services they feel confident of wresting the Jones county laurels from the erstwhile invincible Lightfoot Lilies. The newcomer's name is Steve Speed. His extraordinary ability was first discovered while he was in the box one day last week. He stopped an easy grounder and tossed it over to first to catch the runner. The ball had no sooner left his hand than, to his horror, he discovered that first was uncovered. Without a moment's hesitation he made a dive for the bag and succeeded in reaching it just in time to catch the ball that he had thrown but an instant before, thereby scoring a put out and an assist unassisted.'

"Boys," said the Sluggo, crumpling the paper savagely in his fists, "to lily park with you. Practice begins at once. Bustle!"

"Well, sir, that week we practiced in the morning the boys would all go down to the station and race the train as they steamed out of town. After noon they'd come up a bit and just indulge in short sprints paced by the town trolley car. At night the drill practice would conclude with a brisk cross country run around the township. The work began to show. At the end of the week we began to have some hopes of beating the Roarers after all. And then came a second copy of the Courier knocking our hopes higher than taxes.

"The wonderful baseball feat performed by Steve Speed," the article said, "which was published exclusively by The Jones County Courier, has been eclipsed by an even more astonishing performance by the same player. We have it from the same high source from which we obtained our former news, that Speed has now become so proficient in running that he is able to pitch the ball from the box and by an incredibly quick start reach the plate in time to catch the ball behind the

Courage Brother Sister Paine's Celery Compound

IS ABLE TO RESCUE AND SAVE
THOUGH DISEASE AND SUFFER-
ING MAY BE DRAGGING
YOU DOWN TO THE
GRAVE.

While Paine's Celery Compound with promptness and certainty cures the ordinary ills of life that people suffer from in their time, its medicinal virtues and powers are far-reaching enough to banish disease and suffering even after the sufferer has been pronounced incurable by his or her physician.

Paine's Celery Compound has, according to the testimony given by hundreds of well known Canadian people, dragged them from certain death at the eleventh hour, and blessed them with a new lease of life. Mrs. Louisa Warner, of Montgomery, N. W. T., writes thus:

"For some years past my nerves and system were almost wrecked by narcotics, used to alliterate pain. The doctors could not help me, and I thought I would forever have to remain a slave to deadly drugs. I often longed for death as a release from my sufferings. After one night of agonizing that were terrible I determined to try Paine's Celery Compound, without any full hope that it would cure me. When I had used a part of the second bottle, I thought it was doing me good; I could sleep well, and did not faint so often, and I decided to continue the use of the medicine. After the use of fifteen bottles, I am completely cured. I feel so strong and well now, and have such perfect health, that I sometimes think it too good to be true. For the benefit of thousands of poor sufferers from disease and the deadly effects of narcotics, I give my testimony and assurance that Paine's Celery Compound will cure them."

Wheels Money in a Barrow.

Syracuse, N. Y., March 17.—An old man came totting into town yesterday pushing a wheelbarrow. He stopped in front of the Salt Springs Bank, took two large satchels from the barrow, and went in. Approaching the receiving window, he began to produce pocket-rolls. He took one from his hat, up it from his boots, a third from his pocket, a fourth from the heavy collar of his long tattered overcoat and five others from inner pockets and lining of his many coats. He emptied them of money, which he gave to the clerk to count. Then he gathered it all up in his hat and retreated to a corner of the room, where he remained for two hours, fondling the bills and coins, and accumulating them. Finally he appeared at the window again and handed the pile in with a sigh.

Taking his two old satchels on his

How a Clerk Worked Up an Excuse That Was Gladly Accepted by His Employer, to Whom He Had Shown Gross Inevitability.

"It's mighty hard for a clerk to be snive and polite all the time," said a department manager in one of the big stores. "A clerk is like any other human being, subject to headaches and indigestion and fits of irritability, and occasionally he will be a little gruff without intending it. When I was younger, a few thoughtless words once came near losing me a good job, and the way I escaped being fired was rather amusing. It happened like this: 'I had charge of the men's furnishings counter in a large clothing store, and the pay being first rate and chance of promotion excellent I was naturally anxious to hold on to the job. One morning, however, I was feeling all out of sorts and was just developing an ugly headache, when a man came in and asked to see some cravats.

"I could tell from his general appearance he was from the north, and he had a curt, semisoperculous manner that irritated me immediately. If I had been feeling well, I would have kept my temper, but my head was throbbing, and when he pawed over the stock, finding fault with everything and sneering at my statements as to quality I began to get crusty.

"Finally I couldn't stand it any longer. 'If you really want a scarf,' I said, 'you'll find plenty here that I dare say, are as good as anything you've been accustomed to wear.' Just then I happened to look up and caught sight of a floorwalker standing in a rear aisle and making frantic gestures to me with his hands.

"If you'll wait a moment," I said to the customer, wondering what the dickens was up. 'I'll see if I can find something else at the other side.' With that I hurried over to where the floorwalker was standing. 'What's the matter?' I asked in a low tone.

"Great Scott, man," he whispered, "that's the boss!"

"The store, as I should have explained, was the southern branch of a New York establishment, and during the time I had been there the head of the firm had never before paid it a visit in person. Consequently I didn't know him, and my blood ran cold when I realized how hopelessly I had rammed my foot into it. During the next five seconds I did some quick thinking, and among other things that came crowding into my mind was the fact that the boss had been married on a short time before. That gave me an idea.

"I'm going back," I whispered to the floorwalker, and in a minute or two you send one of the boys to me with a piece of folded letter paper.

"What are you up to?" he asked.

"Never mind," said I. "You do exactly as I say. Let him just band the paper and walk off. I hurried back to the counter and found my man looking black as thunder. 'Sorry,' I said, still as gruff as ever, "but that's all I have. If nothing in it suits you, you'll have to go elsewhere.

"Very well," he replied sarcastically, "and now let me give you a small piece of information. I—

No. 1 and No. 3 is sold in Hat Portage by W. Coates, Jos. Johnson, J. E. Wood and J. Warner, Druggists.

mill proposed would involve an investment of \$250,000 and would have a capacity of 100 tons of pulp per day.

The coal sheds of the C.P.R. got quite a scorching yesterday about noon. The fire started in the room used for drying sand for the engines. It quickly spread to the roof of the shed, and threatened to destroy the building, but in a short time the C.P.R. brigade had extinguished the fire. The damage was not very heavy.

A special meeting of the Presbytery of Superior was held at the McKee Wednesday afternoon. There were present Rev. J.W. Little, of Dryden, Rev. J.L. Small, of Keewatin; and Rev. W.M. Rochester. Commissioners to the General Assembly were appointed. These are Mr. Murray, of Port Arthur, and Mr. Rochester with Mr. Small as alternative. The Rev. Prof. Beattie, of Louisville, Kentucky, was nominated by the Presbytery for the Chair of Apologetics in Knox College, Toronto. The Rev. John McGuire, now laboring as missionary at the Mikado, applied for reception into the ministry of the church. Mr. McGuire was formerly connected with the Congregational church. After a careful examination of the applicant and a review of his papers, it was agreed to recommend him to the General Assembly for reception into the church. Permission was given to the Fort Frances congregation to borrow money upon church property for the purpose of enlarging their place of worship. Growth has been so rapid there of late that the present accommodation is quite inadequate. The Presbytery then adjourned to meet at Keewatin tonight to consider the work among the Indians of the Lake of the Woods.

100 enjoyed themselves. Various games and amusements among which was one "The floral wedding," consisting of a series of questions relative to marriage and to be answered with the names of flowers. Mrs. Wilson secured first prize, while Mr. Wilson captured the booby prize. The choir rendered two selections, and Mr. Wilson as well as Miss B. Kay sang. At the close of the evening refreshments were served as only Norman ladies can serve them.

Norman hockey boys played Keewatin again Wednesday. At half time the score stood 4-2 in favor of Keewatin and ended 5-3 the same way. The game was very rough, and the Keewatins played splendid slinty. The referee was decidedly unfair and showed his incapacity. Two Keewatin goals were scored on off-sides. On Keewatin player is a brilliant man at the business and introduces new tactics each game. He has a most effective way of downing his opponent, by striking him a solar-plexus blow with the end of his stick. He does this out of kindness of course. Another strategy his stick and pushes with his hands, having never seen hockey except in Keewatin. It is a magnificent sight to watch these beautiful new winks, which a Keewatin referee will always allow from a Keewatin team. Gilloway is the only one over there who knows anything about the game and plays like a gentleman, but he fingers off side occasionally. For Norman, Clarkson, Lamotte and Vic Torran played star games. With a fair referee Norman would have won.

The Methodist Ladies Aid met Wednesday at the home of Mrs. McKersie. Mrs. T. McCulloch is just recovering from a severe attack of la grippe. G. Bryant and family are moving into the adjacent house, which they are thoroughly renovating and which they expect to occupy the beginning of next week.

The Legislature.
Bröckville Recorder: Perhaps it has not been noticed, but it is true nevertheless, that up to the present every man who has spoken on the government side is, or has been, in journalism. The premier is an ex-editor, Mr. Russell, of East Hastings, till recently conducted the Deseronto Tribune. Messrs. Stratton, Pattullo, Auld, Pettipiece, Preston, and Graham are still at the everlasting grind.

DROVE HIM TO HIS DEATH.
Lumber Camp Foreman Responsible For Fate of Man Frozen in the Woods.
Sault Ste Marie, March 19.—Coroner Gibson and a jury have concluded that Arthur Little, whose dead body was found on March 8th, was frozen to death, and that Allan Macklin, the foreman who compelled him to leave the lumber camp in a heavy snowstorm, was personally responsible for his death. Macklin has escaped across the line, but, if captured, will be extradited.

After the game was considerably longer than the previous 2 games. Off-sides and tumbles occurring frequently. Pender, of THE MINER, was allowed to take a rest for a couple of minutes. Shortly before half-time Partington sent in another razzle-dazzle shot and brought the score up to 3 cages.

The score at half-time stood 4-0 for THE MINER.

After play was resumed the puck was kept towards the News' goal pretty well but the splendid work of the defence saved THE MINER bravos from scoring till Shaw made a bold rush and succeeded in landing the rubber in the net. Score 4-0.

After this the play was more even. The News forwards made some good rushes, and Mullin, that masterpiece of good-filling, was proof against some hot shots. Rose blossomed out for heavy checking, and Johnson succeeded in tallying the first goal for the Newsboys.

Then another game followed for THE MINER. W. Partington again doing the trick. Score 5-1.

After some play an off-side was made in THE MINER's goal and all the opposing forward line had a hand in helping to score. Score 5-2.

The last game was for THE MINER and completed a most glorious victory making the score 6-2.

For the News' Chapman, Johnson and Davis were the pick of the seven. Davis made some clever stops, while Chapman was always on the alert on the forward line. Johnson played the best game of all. He made many good rushes, and it was no fault of his that the News was defeated.

For the victorious team all players were in good "form," and well "made up" on their "feet." Mullin "bracketed" surprised the on-lookers with his marvellous stops, while Pender on the "point" was up to the "standard" in a "clean" game. Rose was at every point, and with his "shooting stick" "locked" the "forms" that were on the "press" for a pass. W. Partington and Shaw made splendid "types" of individual rushes and were ably supported by O. Partington and Herb Morrison.

Puckering.
Oysters! Oysters!! Oysters!!!
Stevenson's cork screw rusts paralyze them all.
Owing to the manager of THE MINER not being able to play, our team was considerably weakened.
THE MINER boys are very cocky—see above.
Our Willie played Davis, but could not get that type off his feet.
Manager Hunt showed great bursts of speed at times.
Dillingham was a power of strength on cover point.
Billy Shaw's play burnt holes in the ice.
J. B. Davis planted his feet on the ice and just snail.

While the boys are sweeping everything in the east, we are doing the same at home.

in memory of the patriots and of Queen Victoria's centennial a year ago to the Irish soldiers to wear shamrocks.

The Doves Society will meet next week at the home of Mrs. C. E. Belyea.

Electric Light Question.

Rat Portage, Ont.,
March 21st, 1901.

To the Editor of the Miner:

Dear Sir:—In reference to this vexed question of our town purchasing the Citizens' Telephone & Electric Light Company's plant, I desire to place before some of our townsmen a few comparative figures, which I think should convince the most sceptical of the desirability of purchasing, not only as an investment for the benefit of the town, but also with an eye to their own pockets.

In Fort William, where the plant is owned by the town, and which has only been in existence two years, and run by STEAM, making a fuel bill of over \$3,000.00, and a total revenue of less than \$10,000.00, the rate for one 10-candle power light in offices is \$2 per year. Our company here in Rat Portage charges the modest sum of \$12.00 per year for exactly the same light.

All night lights of sixteen candle power in hotels, halls, stairways, or offices are 15c each per month in Fort William; Rat Portage is again modest and charges anywhere from 50c to 60c. In finishing rooms, bedrooms, kitchen, etc., (10-candle power) the rates is only 25c per light per month in Fort William, whereas Rat Portage makes no reduction for lights placed in such places and stick to their rate of from 50c to 60c. But here again if you wish to burn only 8-c.p. lights, you have only to pay 15c per light per month.

For lighting private houses the following is the tariff for 10-candle power lights in Fort William:

1 to 5 lights	30c each per month
6 to 7 lights	25c " "
8 to 9 lights	25c " "
10 to 11 lights	27c " "
12, 13, 14 " "	20c " "
15 & over	25c " "

Then, again, if you wish to burn only 8-c.p. lights, the rate is just half the above prices.

Accounts are payable quarterly with 10 per cent., off if paid the month they are due.

Now Mr. Editor last year this plant furnished lights at these figures, and provided for sinking fund, interest and all expenses, and had a deficit of only \$2.00 (two dollars and sixty cents.) Need I say anything more, or leave it to all reasonable, right-minded people to say if there is any occasion for us to pay such exorbitant prices as we are doing at present. Apologizing for trespassing on your space.

Yours very truly,
B. G. FRAZER-CHRIE,
Hilliard House.

TO CURE A COLD IN ONE DAY.
Take Laxative Bromo Quinine Tablets. All guards refund the money if it fails to cure. K. E. W. Grove's signature is on each box.

STEAMBOAT LINE FOR SALE.

THE Property of the Pioneer Steam Navigation Co., of Wabigoon, Ontario, consisting of the Steamers "Galeton," and "Wm. Whyte," with their equipment, and 2 Barges as they now lie at the dock at Wabigoon, and the Steamer "Wm. Cross," with her equipment, and 1 Barge as she now lies at the dock at Gold-Block, Ontario, and also a Freight Shed 30 x 30 at Gold-Block, and a stopping place at Pickle Rapids.

The Company has controlled the carrying and passenger trade on Lakes Wabigoon and Manitou and all of the above boats, barges and plant were used in the business last season.

The undersigned calls for Sealed Tenders for all of the above mentioned property in two ways: First, on bloc as a going concern. Secondly, for any portion or portions in pieces.

Tenders will be received up to Monday, the 18th day of April, 1901, at the hour of 12 o'clock noon.

The highest or any tender not necessarily accepted.

The property may be inspected. For further particulars apply to the undersigned.

Dated at Rat Portage, this 14th day of March, 1901.

D. A. PENDER,
Accountant, Rat Portage, Ont.,
Receiver.
